

Action Plan

based on recommendations of the

CIS Program Advisory Board

February 18, 2016

1. Leave the “no concentration” option in the BS in Computer Information Systems
2. Replace one of the 200-level CIS or ISS electives with a 200-level programming elective in the BS in Computer Information Systems
3. Leave the Information Systems Security concentration in the BS in Computer Information Systems
4. Consider replacing the Visual Basic introductory and advanced programming with C# and a Testing and Quality Assurance course in the Software Development Concentration
5. Eliminate the Machine Language course from the Data Science certificate
6. Make “cloud architecture” a part of the Networking Concentration (possibly in the proposed virtualization course)
